Y = the depth, in metres, of the floor of such building which is at a level lower than grade but higher than or equal to 1 m (3.3 ft) below grade,

provided, however, that notwithstanding the calculated value of “Z”, the total allowable gross floor area of the principal building shall be constrained so that the aggregate floor area ratio for all buildings on the lot does not exceed 0.5 to 1.0.

4.6.10(3) In One Family Residential Use Zone RS-3, where there exists on a lot a principal building constructed not later than January 1, 1993, which includes floor area at a level lower than grade but higher than or equal to 1 m (3.3 ft) below grade, for that lot the allowable gross floor area given by the maximum allowable floor area ratio set out in Section 6.3.4(4) shall be augmented by an area in square metres equal to the value of

“Z” represented in the formula: $Z = (X \div 2) \times Y$

where X = the area, in square metres, of the floor of such building which is at a level lower than grade but higher than or equal to 1 m (3.3 ft) below grade, and

Y = the depth, in metres, of the floor of such building which is at a level lower than grade but higher than or equal to 1 m (3.3 ft) below grade,

provided, however, that notwithstanding the calculated value of “Z”, the total allowable gross floor area shall be constrained so that the floor area ratio for the lot does not exceed 0.5 to 1.0.

4.6.11 Gross Floor Area Limit (Bylaw 4335 - June 11/07)
