News Release

Date: September 30, 2014

OBFD file # 2014-41

For Immediate Release:

The Oak Bay Fire Department responded to the Oak Bay High School work site for an incident with a small crane at 09:08 hours this morning. Upon arrival OBFD established command and identified a crane moving roofing material had toppled onto the roof of the new school building, currently under construction. The site was secured by the fire department and one worker was treated for minor injuries by BC Ambulance. The east science wing of the High School has been evacuated until the crane has been stabilized and removed from the site. Command was transferred to Farmer Construction and Work safe BC at 11:19 hours by the Oak Bay Fire Department. The fire department is no longer on the scene as all life safety considerations have been managed.
